SUMMARY

Motivated B.Tech student specializing in Artificial Intelligence and Data Science with a strong foundation in full-stack web development. Experienced in building responsive and user-centric applications using modern technologies through academic projects and industry internship experience. Skilled in problem-solving, teamwork, and continuous learning, with a passion for developing innovative solutions that address real-world challenges.

PROJECTS

- **CATALOGUE MANAGEMENT**- Developed a web-based Catalogue Management System that allows users to add, update, delete, and organize product information efficiently. The system provides a user-friendly interface for managing product catalogs and improving inventory organization.
- **LAND TRACKING APP**- Developed an application for tracking and verifying land records by integrating government land databases and GIS technologies to ensure transparency and accuracy in land transactions. Designed and developed the front end using Flutter for an intuitive user experience. Implemented backend services to handle land record storage, retrieval, and verification.
- **E-COMMERCE WEBSITE**- Developed a responsive E-Commerce Website that enables users to browse products, view product details, manage shopping carts, and place orders through an intuitive interface. The project demonstrates skills in frontend development, state management, and user experience design.
- **WEATHER APP**- Created a responsive Weather Application using React and the OpenWeather API. The app fetches real-time weather data and displays temperature, humidity, wind speed, and weather conditions based on user-selected locations.
- **PARKING MANAGEMENT**- Built a Parking Management System to manage vehicle parking records, track slot availability, and automate parking allocation. The application helps reduce manual work and improves parking space utilization.
- **HOSPITAL MANAGEMENT APP**-Developed a Hospital Management System to streamline hospital operations by managing patient records, doctor details, appointments, and medical information. The application improves administrative efficiency, reduces manual paperwork, and provides organized access to healthcare data.

HOBBIES & INTERESTS

- SPORTS-OUTDOOR
- LISTENING TO MUSIC
- WEB DEVELOPMENT
- LEARNING EMERGING TECHNOLOGIES
- PROBLEM SOLVING & CODING CHALLENGES

ACTIVITIES

- *Workshops and Seminars Attended: Vedik IAS Academy 5G, IOT Workshop
- *Participated in Technical Hackathons
- *Software Development Intern | Litmus7, Infopark, Kochi
- Gained practical experience in software development, web technologies, and collaborative project execution while working in a professional development environment.
